

Congratulations to KACD on their 76th Annual Convention!

“NRCS thanks our land stewards across Kansas for their relentless efforts to conserve natural resources.” - Karen A. Woodrich, State Conservationist

Profiles in Soil Health

Natural Resources Conservation Service (NRCS) and Kansas Association of Conservation Districts (KACD) recently pursued a project interviewing producers addressing natural resource concerns through voluntary landowner involvement. These producers are influential stewards of the land. They are also Conservation District Board Members that share the important relationship between NRCS and Conservation Districts in conserving our natural resources across the beautiful landscapes of Kansas.

The videos can be accessed on the [NRCS YouTube account here.](#)

Thank you!

KACD and NRCS have a long standing history of working side by side on conservation efforts across Kansas.

Thank you for being a Partner and advocate of responsible management of our natural resources.

Kansas Natural Resources Conservation Service
